

# ANTHROPOLOGY (ANTH/ANTH&)

<b>Selected</b>	<b>Topics</b>	
ANTH 280		1-3 Credits/Units
3.0 hours of lecture		
Selected topics in Anthropology. Topics vary and course theme and content change to reflect new topics. Because the course varies in content, it is repeatable for credit. Individual topics are listed in the term class schedules. [GE, SE]		
<b>Special</b>	<b>Projects</b>	
ANTH 290		1-5 Credits/Units
5.0 hours of lecture		
Department consent required for enrollment. Opportunity to plan, organize, and complete special projects approved by the department. [GE]		
<b>Archaeology</b>		
ANTH& 204		5 Credits/Units
5.0 hours of lecture		
Study of ancient and prehistoric cultures of the world. Introduction to theories and techniques of archaeological investigation. [GE, SE, SS]		
<b>Cultural</b>	<b>Anthropology</b>	
ANTH& 206		5 Credits/Units
5.0 hours of lecture		
The concept of culture, a study of cultures directed toward a broad understanding of how people view their world, cope with their environments, and organize their lives. [GE, SE, SS]		
<b>Bioanthropology</b>	<b>W/Lab</b>	
ANTH& 215		5 Credits/Units
4.0 hours of lecture / 2.0 hours of lab		
The biological study of human beings and primates, past and present: human genetics, biological adaptation and variation, evolutionary principles, the primate order, human origins, and applied biological anthropology. Fulfills social science or laboratory science (lab) distribution credit. [GE, NS, NS-LAB, SE, SS]		
<b>Primatology</b>		
ANTH& 245		5 Credits/Units
5.0 hours of lecture		
Reviews current understandings of behavioral and biological diversity in the Primate order. Focus is on living primates and how they are distributed across the globe, the major biological differences between primate groups and what field and captive research has discovered regarding the range of social behaviors, group patterns, foods, communication systems and cognitive abilities they display. Students practice basic research techniques used to study primate behavior in the wild and examine the major challenges faced by modern conservation efforts in protecting wild primate habitats. [GE, NS, SE]
